Sage Enterprise Intelligence

Bring light to your data, in a flash.

Sage Enterprise Intelligence is an intuitive business intelligence solution integrated with your Sage ERP system to help business users reduce time spent on analysis and reporting and make faster, better-informed decisions. It empowers all users with a simple solution to access and analyze data in a self-sufficient manner, which eliminates the need for disparate tools and specialized skills and can reduce time to decision.

The tight and secure integration of Sage Enterprise Intelligence with Sage ERP solutions ensures the reliability of critical business information and provides business users real-time and reliable information to make faster and better business decisions across the enterprise.

Empower managers and executives with self-service analytics

Business users access and analyze enterprise data in an intuitive self-sufficient manner, which can improve visibility into their business, accelerate notification of important changes, and reduce time to decision by 20% on average.

Improve collaboration and operational performance

Sage Enterprise Intelligence leverages the central database of your Sage ERP solution and other sources, which provides business users with coherent, real-time insight on enterprise data, supports coherent decision making, and fosters continuous cross-functional improvement.

It includes sharing and alert functionality to provide managers with consistent, up-to-date information that plays a significant role in improving supply chain performance, resolving quality issues, improving marketing decisions, and building a faster, larger sales pipeline.

Benefits

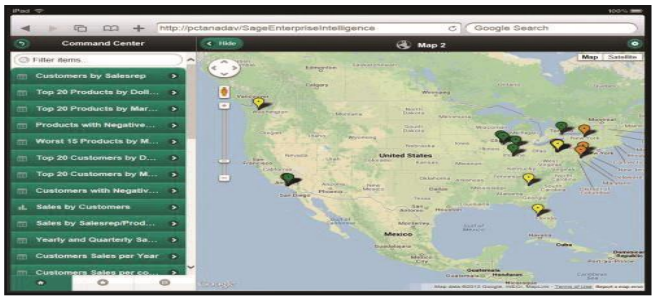

- **Reduce time** spent on business analysis and reporting.
- **Empower users** to analyze and report on information in a selfsufficient manner.
- **Simplify** and accelerate the distribution of information across the organization, for coherent and better-informed decision making.

Available for the following Sage ERP systems

- **Sage 300 ERP**
- **Sage 500 ERP**
- **Sage ERP X3**

Sage Enterprise Intelligence empowers users to analyze and report on business without assistance.

Gain remote access to enterprise data, including geospatial analysis, on mobile data devices or a web browser.

“Sage Enterprise Intelligence is easily twice as fast as our former reporting tools. That speed means our staff spends less time looking for data and more time acting on that data.”
Marc Lefebvre

Vice President and CIO (retired), Ganong Bros. Limited
